republish all or part of the article in a print publication?

- As the author of an APS-published article, may I give permission to a colleague or third party to republish all or part of the APS-published version in an online journal, book, database compilation, etc.?
- As the author of an APS-published article, may I provide a PDF of my paper to a colleague or third party?
- As a third party (not an author), may I republish an article or portion of an article published by APS?
- As a third party, may I use articles published by APS for lecture and classroom purposes?
- How do I request permission to republish APS-copyrighted material?

What is copyright? <http://www.copyright.gov/> (<http://www.copyright.gov/>)

Copyright is a form of legal protection for original works of authorship. Copyright covers both published and unpublished works.

What does copyright protect?

Copyright, a form of intellectual property law, protects original works of authorship including literary, dramatic, musical, and artistic works, such as poetry, novels, movies, songs, computer software, and architecture. Copyright does not protect facts, ideas, systems, or methods of operation, although it may protect the way these things are expressed. See Circular 1, Copyright Basics, section "What Works Are Protected", see <http://www.copyright.gov/circs/circ01.pdf> (<http://www.copyright.gov/circs/circ01.pdf>)

How is a copyright different from a patent or a trademark?

Copyright protects original works of authorship, while a patent protects inventions or discoveries. Ideas and discoveries are not protected by the copyright law, although the way in which they are expressed may be. A trademark protects words, phrases, symbols, or designs identifying the source of the goods or services of one party and distinguishing them from those of others.

What is the difference between copyright infringement and plagiarism?

Copyright infringement occurs when an author's work is reused or republished without the permission of the copyright owner, whether or not author attribution accompanied the reuse.

Plagiarism occurs when an author's work has been reused or republished in such a manner as to make it appear as someone else's work, e.g., without quotation marks and citation of the original work.

Why should I transfer copyright to APS?

Like many other scientific publishers, the American Physical Society (APS) requires authors or their employers to provide transfer of copyright prior to publication. This permits APS to publish the article and to defend against improper use (or even theft) of the article. It also permits APS to publish the article online and to use the article in other forms or media, such as PROLA. By the APS transfer agreement, authors and their employers retain substantial rights in the work, as specified in the agreement <https://journals.aps.org/authors/transfer-of-copyright-agreement> (<https://journals.aps.org/authors/transfer-of-copyright-agreement>) and discussed in your copyright permission letter.

Why should I transfer copyright to APS before the article is accepted for publication by an APS journal?

Transferring copyright early in the process avoids the possibility of delaying publication if the transfer has to be obtained later in the process. As stated in the terms of the copyright transfer agreement, transfer does not take effect until the paper is accepted by an APS journal. The author retains the copyright until acceptance, and has the full freedom, for example, to withdraw the paper from consideration by an APS journal and submit it elsewhere.

Does transferring copyright affect my patent rights?

No. Copyright is separate from any patent rights, and the APS transfer agreement specifically states that patent rights are not affected. However, you should be aware that submitting a manuscript to a journal without first taking steps to protect your patent rights (e.g., filing for a patent) could endanger those rights. Consult your patent attorney.

As the author of an APS-published article, may I post my article or a portion of my article on my own website?

Yes, the author or the author's employer may use all or part of the APS published article, including the APS-prepared version (e.g., the PDF from the online journal) without revision or modification, on the author's or employer's website as long as a fee is not charged. If a fee is charged, then APS permission must be sought. In all cases, the appropriate bibliographic citation and notice of the APS copyright must be included.

What happens if the author has posted an APS-published article on a free access e-print server or on the authors' or institutions' web page and subsequently a fee is imposed for access to those sites?

When a fee is imposed, the author must either obtain permission from APS or withdraw the article from the e-print server or Institutional Repository.

As the author of an APS-published article, may I post my article or a portion of my article on an e-print server?

The author has the right to post and update the article on a free-access e-print server using files prepared and formatted by the author. Any such posting made or updated after acceptance of the article for publication by APS should include a link to the online APS journal article abstract. In all cases, the appropriate bibliographic citation and notice of the APS copyright must be included.

As the author of an APS-published article, can I post my article or a portion of my article on a web resource like wikipedia or quantiki?

Sites like wikipedia and quantiki are strict about permissions and require that authors hold copyright to articles that they post there. In order to allow authors to comply with this requirement, APS permits authors to hold copyright to a "derived work" based on an article published in an APS journal as long as the work contains at least 10% new material not covered by APS's copyright and does not contain

This site has 50% of the Text (including equations) of the original article. The APS will extend the author of a "derived work" the right to all papers published in APS journals.
