Web posting guidelines for papers published in AIP Journals and Proceedings

In accordance with the terms of its Transfer of Copyright Agreement,* the American Institute of Physics (AIP) grants to the author(s) of papers submitted to or published in one of the [AIP journals](#) or [AIP Conference Proceedings](#) the right to post and update the article on the Internet with the following specifications.

*AIP Advances authors may make their work available according to the terms of the [Creative Commons 3.0 Unported License](#).

On the authors' and employers' webpages:

- There are no format restrictions; files prepared and/or formatted by AIP or its vendors (e.g., the PDF, PostScript, or HTML article files published in the online journals and proceedings) may be used for this purpose. If a fee is charged for any use, AIP permission must be obtained.
- An appropriate copyright notice must be included along with the full citation for the published paper and a Web link to AIP's official online version of the abstract.

On free-access E-print servers:

- Author-prepared files only may be used; files prepared and/or formatted by AIP or its vendors (e.g., the PDF, PostScript, or HTML article files published in the online journals and proceedings) may **not** be used for this purpose.
- An appropriate copyright notice must be included along with the full citation for the published paper and a Web link to AIP's official online version of the abstract.

On U.S. NIH's PubMed Central repository:

- In compliance with the [Public Access Policy](#) of the National Institutes of Health (NIH) of the U.S. Department of Health & Human Services, the American Institute of Physics will automatically deposit, with the National Library of Medicine's PubMed Central (PMC) online repository, any journal article published after 6 April 2008 that reports research funded, at least in part, by the NIH. AIP will deposit the article with PMC in final, published form, along with its associated metadata, upon publication, and will provide authors with the PMCID number once it has been assigned. Please note, however, that the full text of the article will not become available on PMC until one year after publication.
- For articles for which the author has paid AIP's fees for open access publication (either via the *AIP Author Select*® program or for an AIP open-access journal), AIP will notify the repository that they may post the article upon publication by AIP and its transmission by AIP to the repository.
- Authors need only to sign the AIP Transfer of Copyright Agreement without any amendments or substitutions in order to be fully compliant with institutional repository requirements, such as those imposed by Harvard, MIT, and other universities. Our agreement respects the spirit of the initiative toward self-archiving of material and supports the basic premise that authors have freedom to reuse their own work for scholarly, noncommercial purposes.
- Please contact AIP's Office of Rights & Permissions (rights@aip.org) with any questions.

Format for copyright notices

After publication by AIP, the author is required to post the following copyright notice:

Copyright (year) American Institute of Physics. This article may be downloaded for personal use only. Any other use requires prior permission of the author and the American Institute of Physics.

along with the following message:

The following article appeared in (citation of published article) and may be found at (URL/link for published article abstract).

Prior to publication by AIP, the notice should state:

The following article has been submitted to/accepted by [Name of Journal]. After it is published, it will be found at ([URL/link to the entry page of the journal](#)).

For AIP Advances Creative Commons licensed material, the author should post the following notice:

Copyright (year) Author(s). This article is distributed under a [Creative Commons Attribution 3.0 Unported License](#).

Creating links

To create a link to your article* in an AIP journal or proceedings, you need to know the [publication code](#) for the journal or proceedings series, the volume number and the starting page number or citation identifier (article number). The general format for the URL is:

<http://link.aip.org/link/?pub/vol/page>, where

pub is the 3 letter publication code

vol is the volume number, and

page is the starting page number of the article or the six-character citation identifier (of the form 023103).

Example: To link to G. A. Gibson et al., Appl. Phys. Lett. 86, 051902 (2005).

The URL is:

<http://link.aip.org/link/?apl/86/051902>

The HTML link is:

G. A. Gibson et al., Appl. Phys. Lett. 86, 051902 (2005)

The Link would appear as:

[G. A. Gibson et al., Appl. Phys. Lett. 86, 051902 \(2005\).](#)

*Article links go to the online abstract, which contains links to all available full-text formats.
