To Our Policyholders

Texas Workmen's Compensation Benefits and Premium Increase

Within the last decade, we have observed a gradual increase in the cost of living. During this period, the maximum benefits payable to employees injured in occupational accidents have remained constant.

The Texas Legislature, in responding to this situation, has enacted an amendment to the Workmen's Compensation Law increasing the maximum benefits payable under the law. The maximum weekly benefits for disabled employees have been increased by 40 per cent from \$35.00 to \$49.00. In most instances, this will increase the payment to employees while they are disabled by occupational injuries and will result in higher death benefits.

It will be necessary to increase the Workmen's Compensation rates and premium to defray the cost of the increased benefits. The State Board of Insurance has announced that a 17.7 per cent increase will be applied to the rates and premium on all Workmen's Compensation policies, effective May 17, 1969.

Because of the increase in the rates, it will be necessary to prepare an endorsement for attachment to your present policy. An endorsement incorporating the increase will be mailed to you shortly.

In the meantime, if you have any questions concerning the increased benefits or premium rates, please give us a call.

Sincerely yours,

Richard Stone

It is important that the quarterly report of values not including Magnetic Laboratory be in the insuring company's hands not later than fifteen days beyond the last day of the three month period because the policy contains the following Coinsurance Clause. "This Company shall be liable for no greater proportion of each loss than the total values last reported prior to the loss, bears to the total value at risk at the time of the loss."

Exception: Due to the age and difficulty to arrive at an acceptable value on the Magnetic Laboratory, the policy is endorsed so that the \$281,000 value is "agreed to be correct" and the Coinsurance Clause is not applicable to this item.

Insured property lost or damaged shall be valued at its Actual Cash Value at the time of the loss, but not exceeding the cost of replacing such property with like kind and quality or what it would cost to repair the damaged property. Exception: Magnetic Laboratory Equipment.
