THIRD SHORT COURSE FOR COLLEGE GEOLOGY TEACHERS GETS FOUNDATION GRANT

More than 25 college teachers in geology and related subjects will come to the Southwest Center for Advanced Studies this summer for the third annual "Short Course in Geochemistry, Geology and Geophysics."

A grant of \$17,150 for partial support of the course was announced today by the SCAS' Geosciences division. The award was made by the National Science Foundation.

Past courses, three weeks in length, have been held during August. Teachers attending have represented colleges from 27 states, Florida to Washington and Maine to California. Five department chairmen have been included in the "student" listings.

Prof. Anton L. Hales is head of the SCAS' Geosciences division.
